

# ENVIRONMENTAL POLICY

At PLAMTEX INT d.o.o., we have set our fundamental guideline to continuously care for our living and working environment. We aim to ensure that the impacts of our activities remain within legally prescribed and other applicable requirements, or are reduced to the lowest possible level.

This will be achieved through the following main directions:

## **CONTINUOUS COMPLIANCE WITH ENVIRONMENTAL LEGISLATION AND OTHER REQUIREMENTS**

*related to environmental management and our business activities, including fulfilling the expectations of local communities.*

## **PREVENTION OF POLLUTION AND EMERGENCY EVENTS**

*through constant monitoring and continuous improvement of our processes.*

## **ENSURING A CLEAN AND SAFE ENVIRONMENT**

*by implementing new technologies according to reference document requirements, through regular equipment maintenance, and by ensuring proper functioning.*

## **RATIONAL USE OF NATURAL RESOURCES BY USING A SOLAR POWER PLANT**

*(electricity, raw materials, water, etc.)*

## **RECYCLING**

*of waste raw materials.*

## **RESPONSIBLE WASTE MANAGEMENT**

*by reducing waste generation in our processes and organizing designated areas for safe waste disposal.*

*It is important that all employees, including our suppliers, are aware of how their work can positively or negatively affect the environment, and how this impact can be minimized.*

*Our environmental policy is always available to the public.*

*PLAMTEX INT will regularly monitor the implementation and planning of all actions aimed at achieving our environmental objectives and programs, while promoting awareness and commitment to continuous improvement and pollution reduction.*

*I personally commit to this policy and expect the same from all employees in the company.*
